5.9 per cent during Seventh Five Year Plan or even 5.6 per cent during Sixth Five Year Plan;

(b) the reasons for declining trend in GDP rate during the successive Plans and what is the projected GDP growth during the Tenth Five Year Period; and

(c) what measures are proposed to be adopted so that the targeted GDP rate is achieved?

THE MINISTER OF STATE OF THE MINISTRY OF PLANNING (SHRIMATI VASUNDHARA RAJE): (a) Yes, Sir.

(b) The GDP growth rates increased from the Sixth Plan to the Eighth Plan. In the Ninth Plan, however, there was a decline. The reasons for low growth in the Ninth Plan are mainly emanating from poor growth in agriculture sector and shortfall in public investment and savings. As per the Approach Paper to the Tenth Five Year Plan (2002—07), which was approved by the National Development Council in September 2001, an average GDP growth target of 8 per cent per annum is proposed for the Tenth Five Year Plan.

(c) The Tenth Plan is under formulation.
